## ROAD SAFETY IS EVERYONE'S RESPONSIBILITY

SECRETARIAT OF THE COUNCIL ON ROAD  
TRAFFIC SAFETY

### 1. Tires

❖ Tires are one of the most important factors for the safety of your car, and therefore the use of appropriate tires is very important.

❖ During the winter season, there should be used winter tires, because even though it is sanctioned by law, the braking distance is much shorter with adequate tires.

❖ Also having the same pressure in all tires is very important, therefore, please check the tire pressure occasionally.

### 2. Speed

❖ Exceeding the speed limit is one of the main factors of death of people in road accidents

❖ Excess of the speed limit minimizes the possibilities of reaction in time, because the driver cannot perceive a given situation correctly

❖ Respect the speed limit in every occasion  
❖ Adjust the speed movement according to the road conditions

### 3. Safety distance

❖ While driving the vehicle, make sure you keep the required safety distance towards the vehicle in front, because only in this way, you can ensure the required time for reaction in case of any unexpected situation where you have to brake, and you can avoid the possibility of an accident with the vehicle in front.

### 4. Safety belt

❖ In case of accidents, the use of safety belts and child seats are the most important factors in order to minimize the consequences of accidents.

❖ Prior to starting the vehicle, first you must put on the safety belt, and then make sure that also the passengers have put on their safety belt, and in cases you have small children, use child seats.

### 5. Signs and traffic rules

❖ While driving the vehicle, it is necessary that in every case you must respect the road signs and traffic rules, because in this way the possibility of accidents will be reduced.

❖ Be a good example for others, by respecting the road signs and traffic rules.

### 6. Behavior in traffic

❖ It is not enough only to respect the road signs and traffic rules, but you should behave with culture and tolerance in relation to other participants in traffic.

❖ Driving carefully and failure to use the advantage of passing in cases where accidents are likely to occur are behaviors that should be respected.
